1. Introduction. In this review, the term eating behaviour has been used to encompass a range of variables (i.e., food intake, choice, preference, hedonic response [liking], acceptance [intake], willingness to taste, and neophobia). Besides food intake, other measures provide insight into children's eating behaviour: Preference describes how a food is ranked in relation to other food items.

A mental disorder, also called a mental illness or psychiatric disorder, is a behavioral or mental pattern that causes significant distress or impairment of personal functioning. Such features may be persistent, relapsing and remitting, or occur as a single episode. Many disorders have been described, with signs and symptoms that vary widely between specific disorders.
