Introduction To Linear Regression Analysis Fourth Edition.pdf

Introduction to Mediation, Moderation, and Conditional ...

Thu, 01 Nov 2018 00:01:00 GMT

Lauded for its easy-to-understand, conversational discussion of the fundamentals of mediation, moderation, and conditional process analysis, this book has been fully revised with 50% new content, including sections on working with multicategorical antecedent variables, the use of PROCESS version 3 for SPSS and SAS for model estimation, and annotated PROCESS v3 outputs.

Stepwise regression - Wikipedia

Wed, 14 Nov 2018 18:15:00 GMT

In statistics, stepwise regression is a method of fitting regression models in which the choice of predictive variables is carried out by an automatic procedure. In each step, a variable is considered for addition to or subtraction from the set of explanatory variables based on some prespecified criterion. Usually, this takes the form of a sequence of F-tests or t-tests, but other techniques ...

Logistic regression - Wikipedia

Fri, 16 Nov 2018 14:02:00 GMT

In statistics, the logistic model (or logit model) is a widely used statistical model that, in its basic form, uses a logistic function to model a binary dependent variable; many more complex extensions exist. In regression analysis, logistic regression (or logit regression) is estimating the parameters of a logistic model; it is a form of binomial regression.

Linear Optimization - home.ubalt.edu

Thu, 15 Nov 2018 20:58:00 GMT

Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with the mere determination of the optimal solution.
