PMC. And bear in mind that in addition to stones, many of these techniques can be used to set other materials. Bezel settings, for instance, can be used to set enameled components or polymer clay elements. Prong settings can be used to set coins, tabs can be used to set decorative ceramic pieces, and dozens of other exciting objects.

firing the stone alone by torch, or firing a stone embedded in silver clay. So, in every case, oxygen was present during firing. The new copper-based bronze and copper clays are buried in activated carbon during firing to avoid the creation of fire-scale that is difficult to remove from the surface of the fired metal.
