Lightning is not distributed evenly around the planet, as shown in the map. About 70% of lightning occurs over land in the tropics where atmospheric convection is the greatest. This occurs from both the mixture of warmer and colder air masses, as well as differences in moisture concentrations, and it generally happens at the boundaries between them. ...

"It is with the submarine that the initiative and full freedom of the seas rests. The aircraft carrier, whatever realistic scenario of action is drawn--that of operations in great waters or of amphibious support close to shore--will be exposed to a wider range of threat than the submarine must face.
