CS-102 Logical Organization of Computers . Aims There are two views of computer architecture. The traditional view, dating back to the IBM System/360 from the early 1960's, is that the architecture of a computer is the programmer-visible view of the machine, while its implementation is the province of the hardware designer.

All images are original photos or scans taken by me. In the rush to be always modern and up to date, the first thing we discard is old computer books, manuals, and documents (not to mention old computers). By now the world is so dependent on computers and networks that all commerce would cease if ...
